TECHNICAL VIEW:

The Nifty50 settled above the 11,000 mark on Tuesday and formed a small bullish candle on the daily chart. During the session, the 50-pack strikingly traded in the same trading range as Monday's, but the only difference was that the Tuesday intraday high fell short of Monday's high by a small margin. Nifty supports shifted higher and the trade setup remains in favor of the bulls, but the index needs further strength to get past multiple hurdles and make its way towards the 11080. Nifty futures have resistance 11070. After crossing this level it can reach up to the level 11150. In the downside nifty futures has support near 10910 after breaking this support it can slip till level of 10800.
